

**The secret of
winning the
region 1 VHF
contest from
far up north**

5P5T

Who are 5P5T

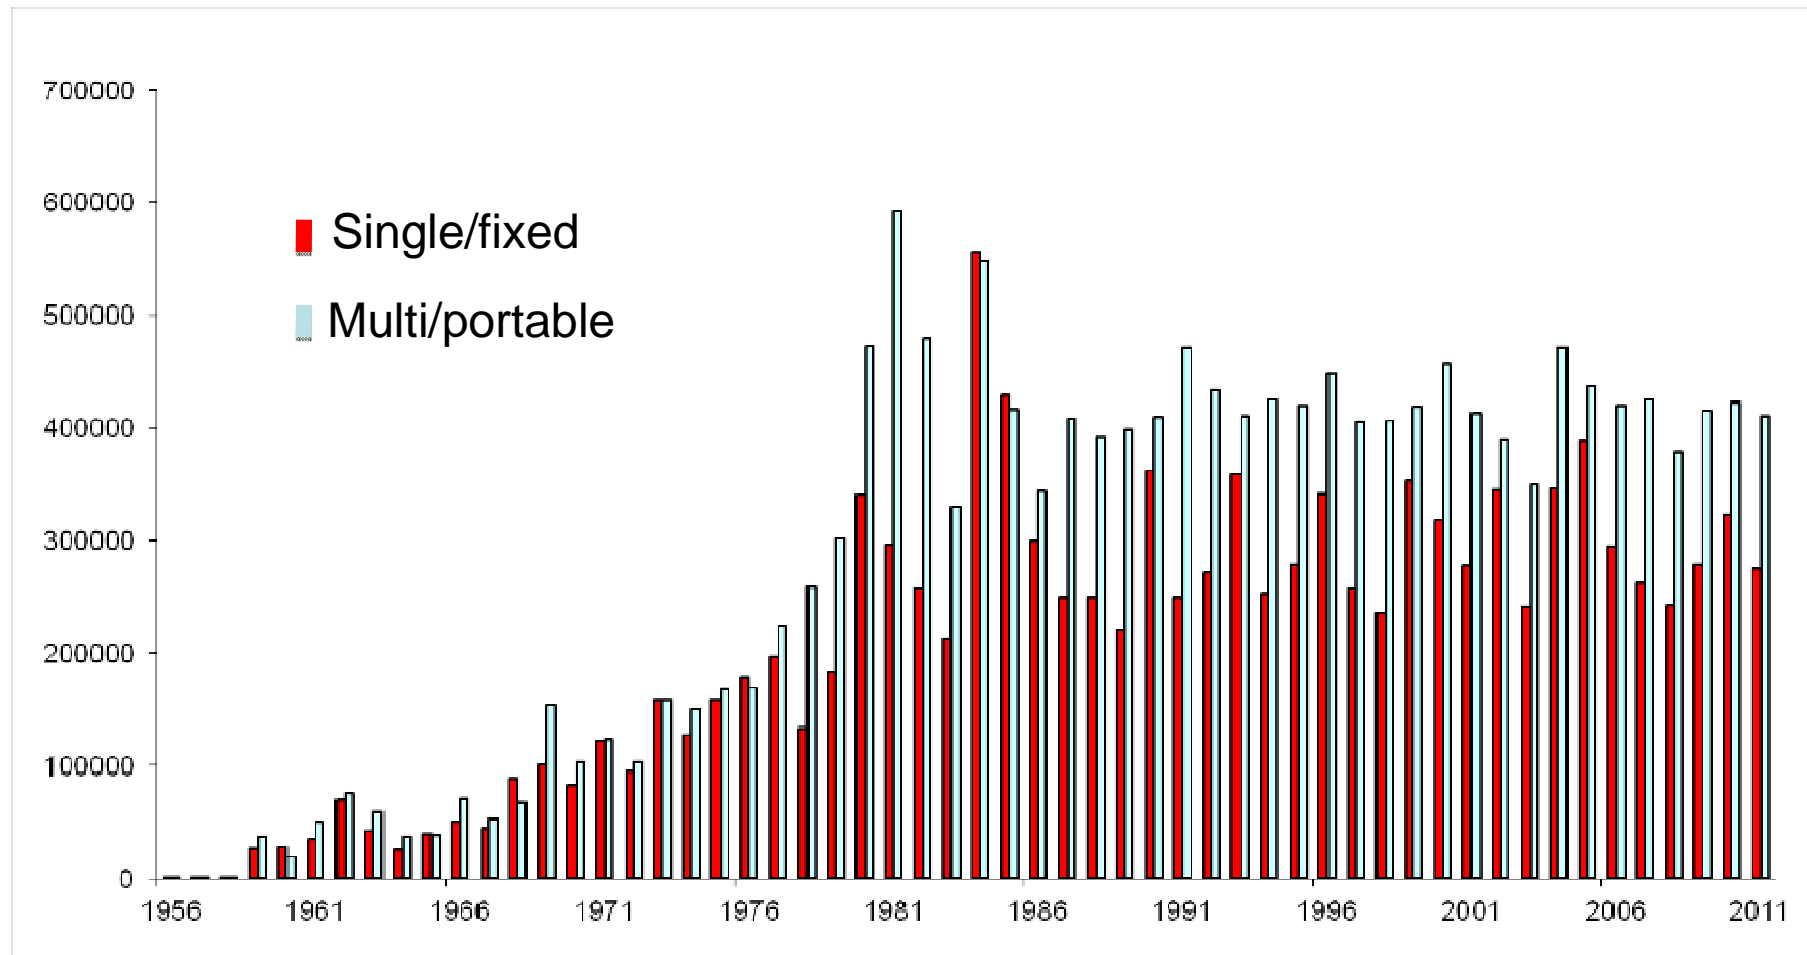

- OZ1DJJ/OX3LX
- PA5DD/OZ1DOQ
- OZ1GER
- OZ5BD/OX5T
- OZ1FDH
- OZ1HDF
- AG6QV/OZ1GPI

Why the region 1 VHF test?

- It is the largest prize you can dream of in a VHF contest. It doesn't get any bigger!
- You need state of the art equipment and the best operators.
- OZ hasn't won since 1973, but sometimes miracles happen!
- My own dream started in 1979, -a few months after I got my license...

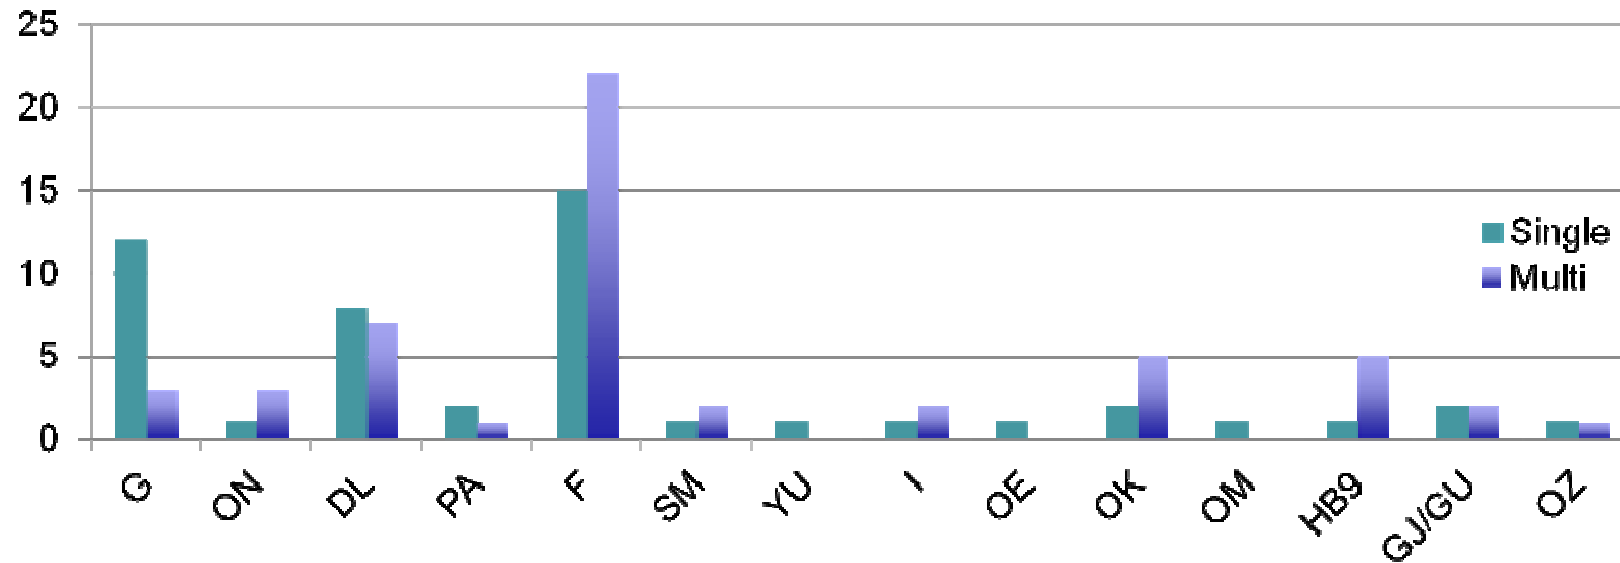

Winning scores 1956-2011

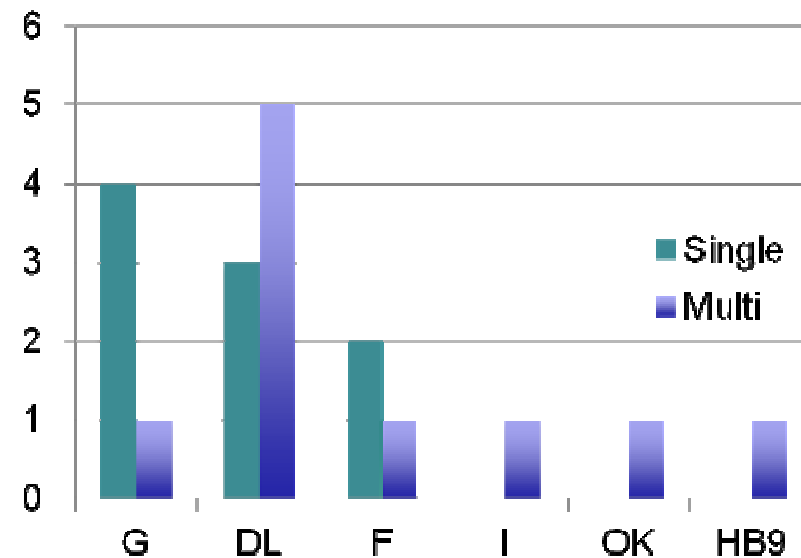

Records: Points OK1KHI/P 1982, 591,000; QSO's DL0GTH 2006, 1245 QSO

Distribution of winners by DXCC

1956-2011

2001-2011

–the golden year for OZ!

57. OK1VHN	19 551
69. OK1VCW	17 741
72. OK1NQ	17 347

[illegible]

12. OK1PG/P	65 928
24. OK3CD/P	51 223
37. OK3HO/P	45 244

OZ1OZ 1969

- RX: 6CW4
- TX: QQE 06/4
 - x-tal controlled only AM and FM
- Ant 4x6 el
- Operators OZ9PZ, OZ2CV, OZ2ND and OZ5GN
- The trophy never arrived, but 1969 was not a good year in OK.

OK1KHI/P 1981

- Absolut all time record of 591,000 points and 1103 QSO
- A modest station achieved this fantastic result
 - 2 x PA0MS yagi
 - PA with QQE 06/40 80 w
 - 2nd RX didn't work

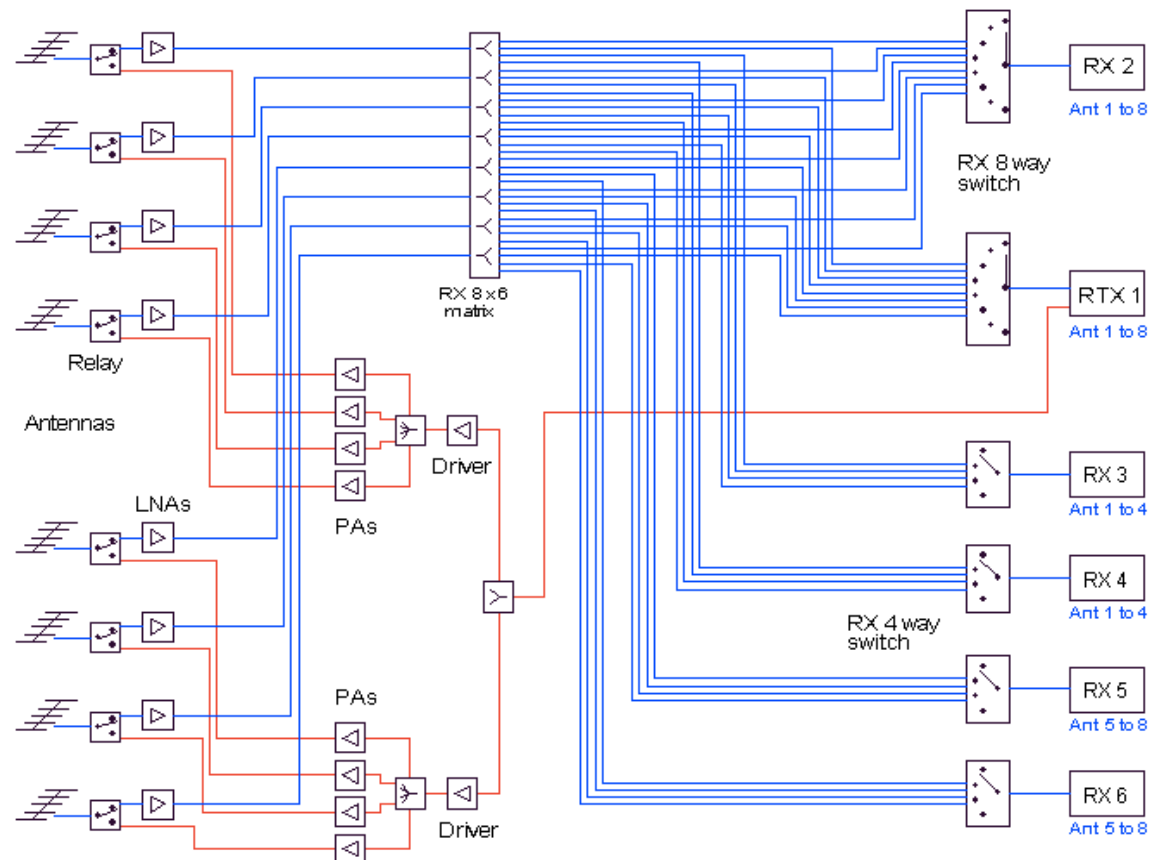

1602 m ASL HK29b

BIG set up: IO3V, winner 2001

- 3264 m ASL
- 8 x antenna systems
- 8 x PA
- 4 x 2nd RX

Winner with
987 QSO og
417,00 points

IO3V
JN56

DR9A –winner 2006, 2009-2011

- QTH in Schwarzwald JN48 ca. 850 m ASL
- 38 m mast with multiple ant. systems
- Also winner of the UHF contest on 432 and 1296 MHz from the same QTH

Central European QRM!

OL4A

DM7A

-a potential source of neighbour conflicts 😊

How is it possible to win the region
1 VHF test from OZ these days?

OZ1DJJ, OZ1FDH, PA5DD, OZ1GER, OZ5BD

You need:

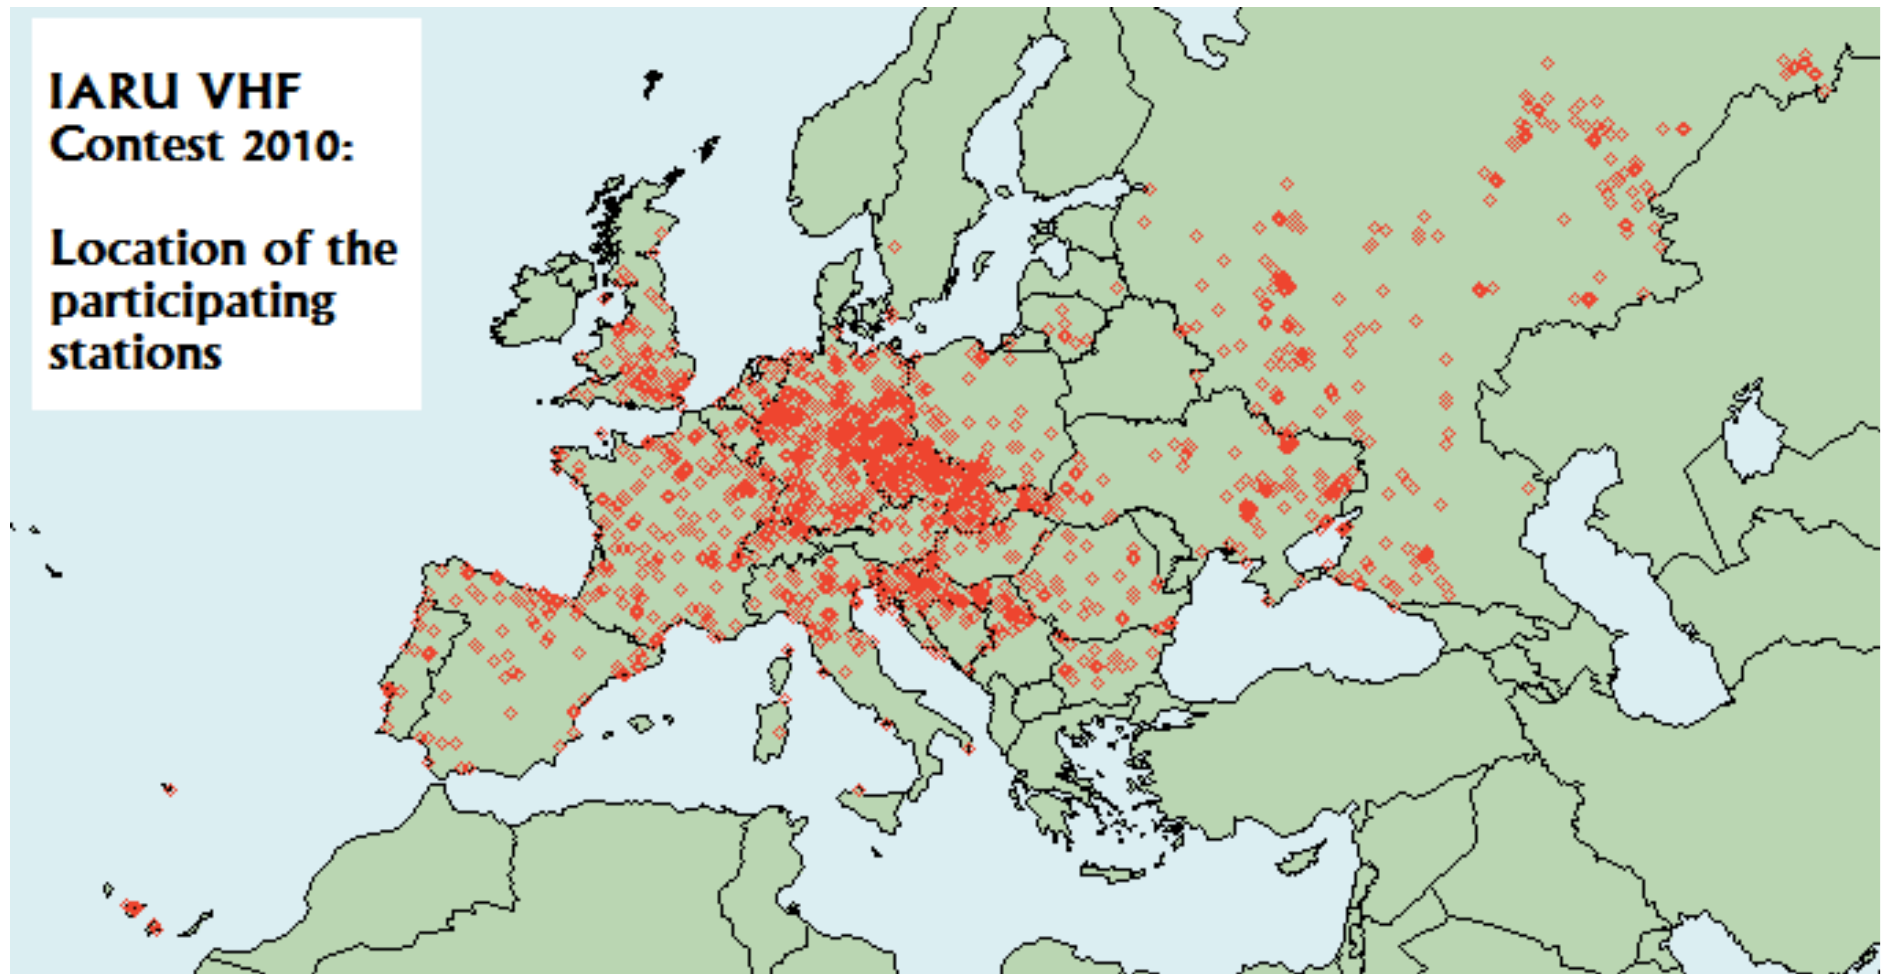

1. More points than the other stations 😊
2. The right QTH
3. Good equipment
4. Good operators
5. Knowledge of the band and activity
6. Good planning

& blood, sweat and tears + LUCK!

The secret formula for making more points

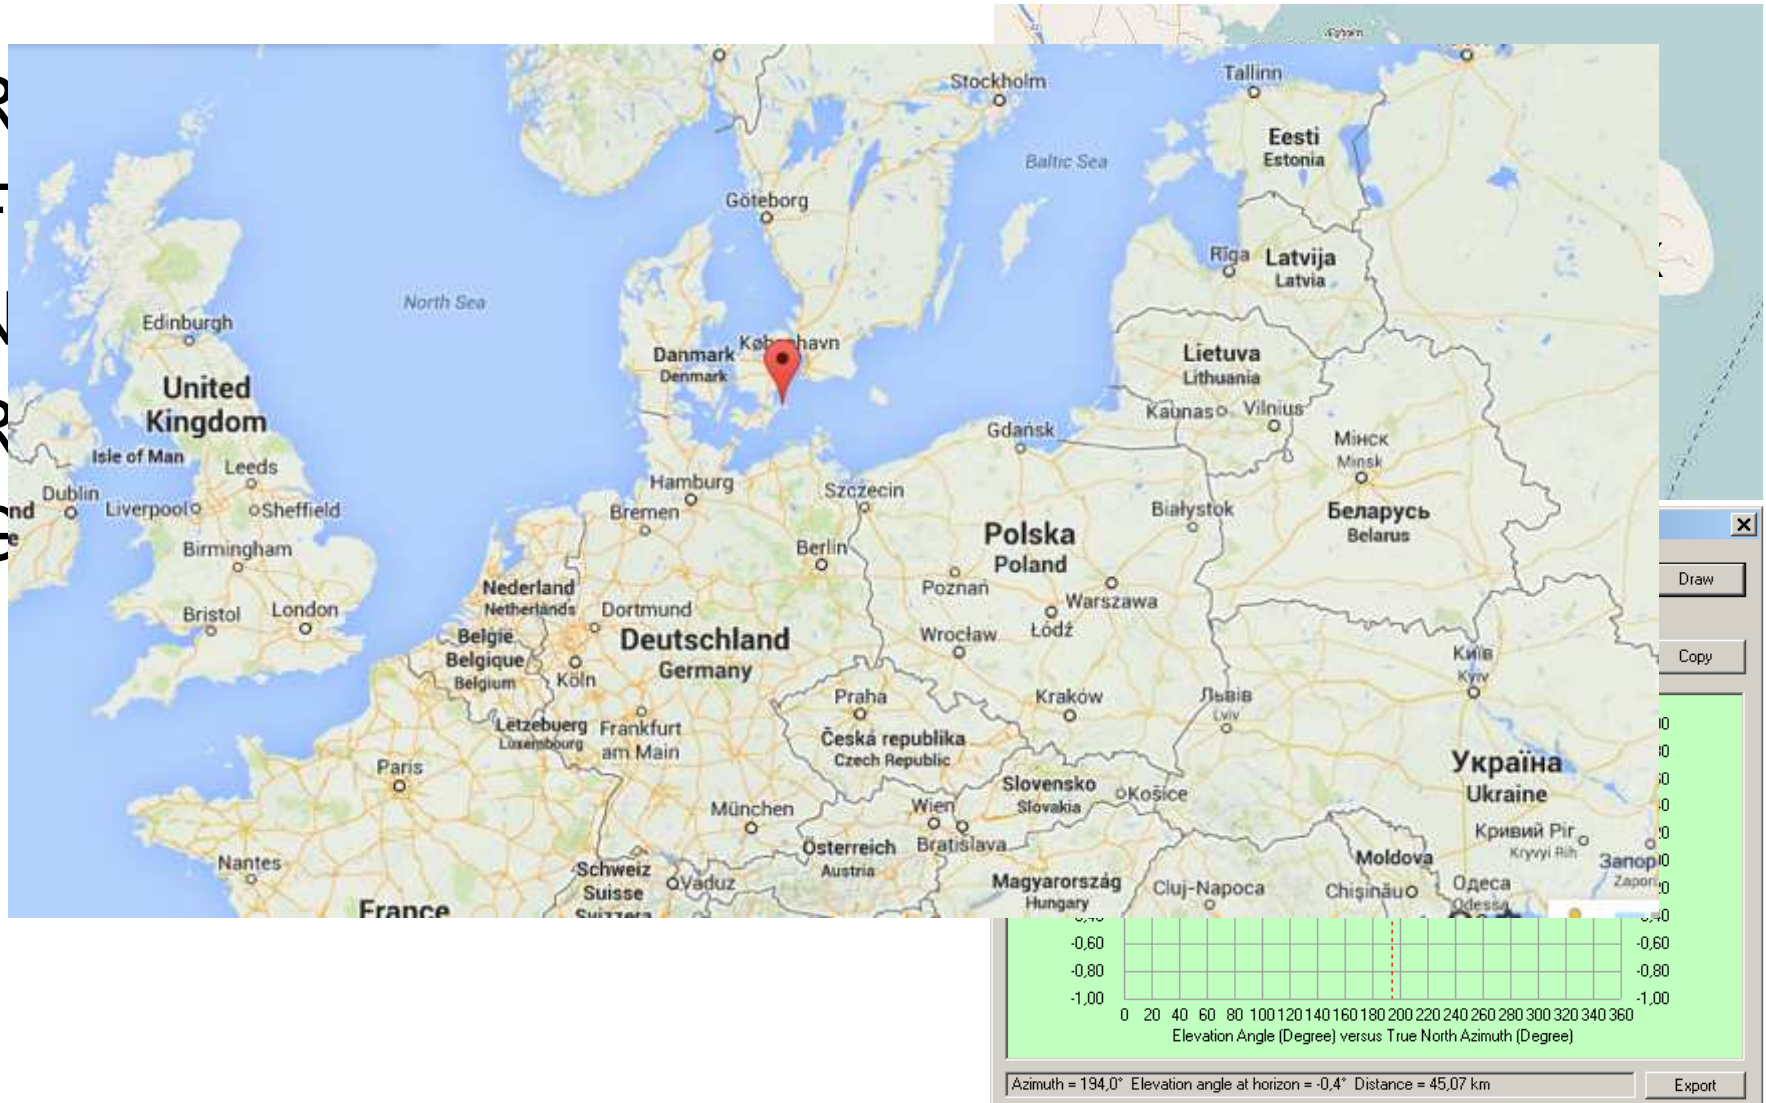

***Contest impact* = QTH x *In* Operator x Reliability² x $\sqrt{\text{ERP}}$
x beamwidth x Ant. gain x sports car effect**

The activity has moved eastward

5P5T station 2013

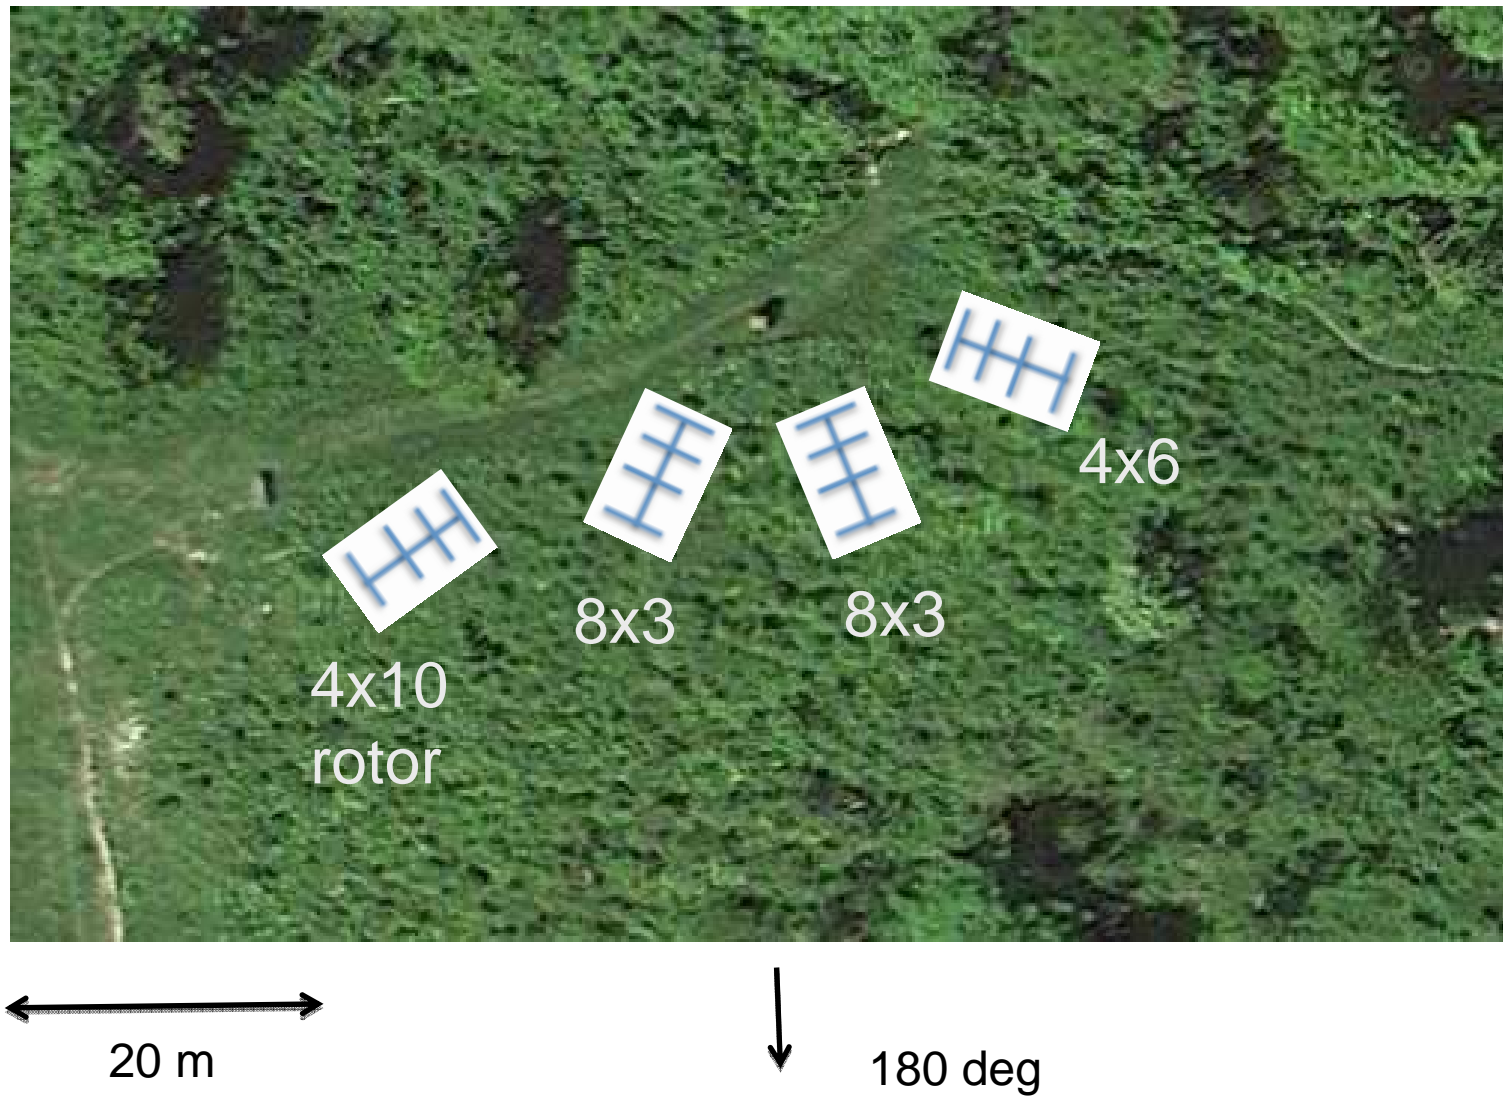

Antennas

- 4x10 el DK7ZB, 4x6 el OZ5HF, 16x3 el DK7ZB

Placement of antennas

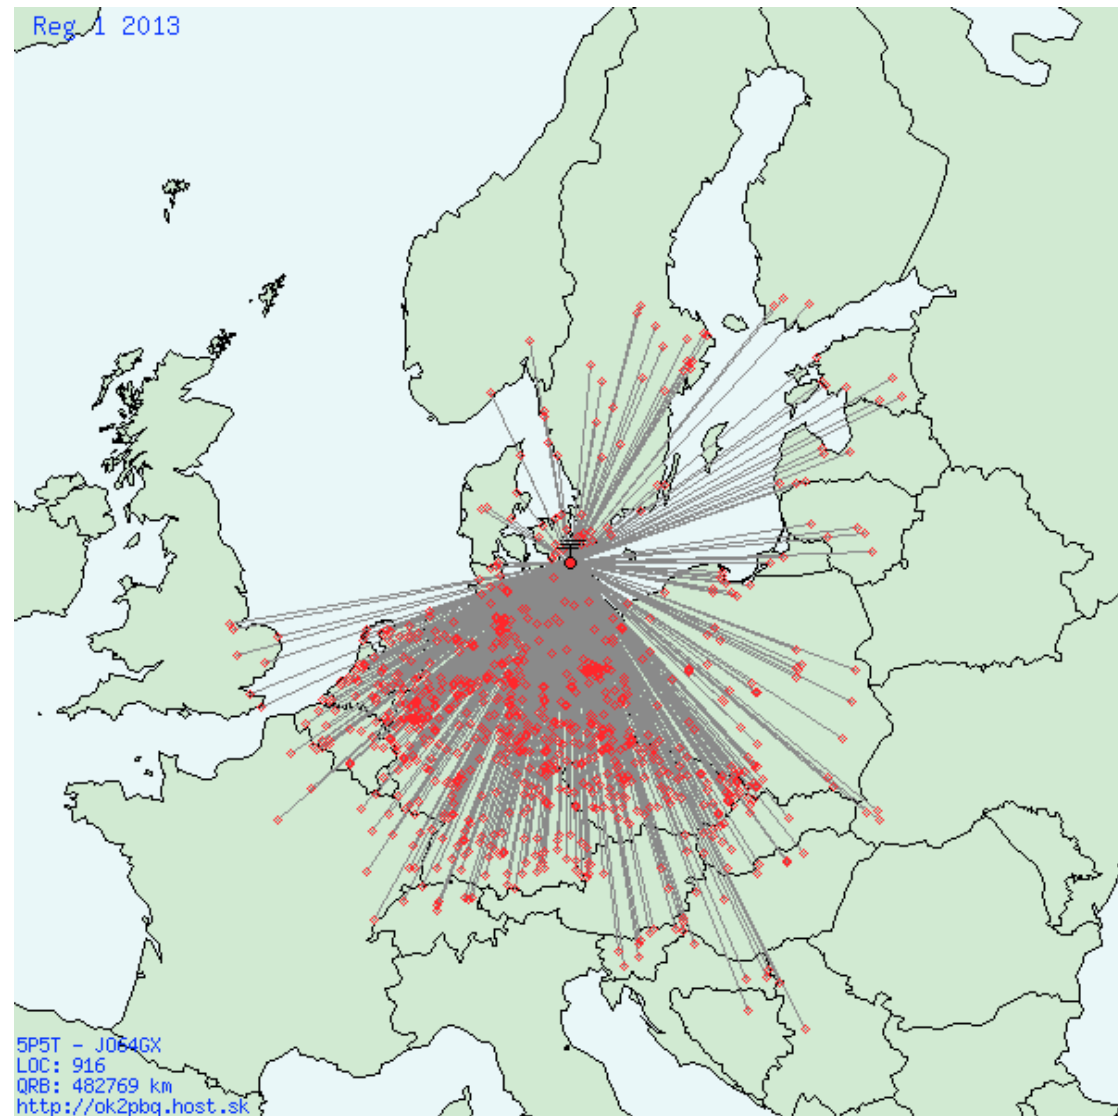

Operator position

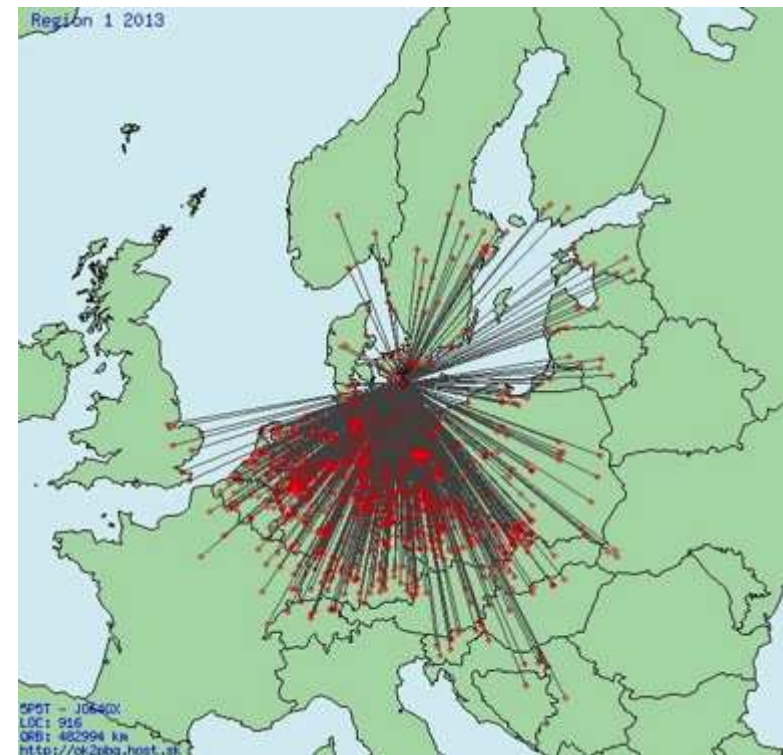

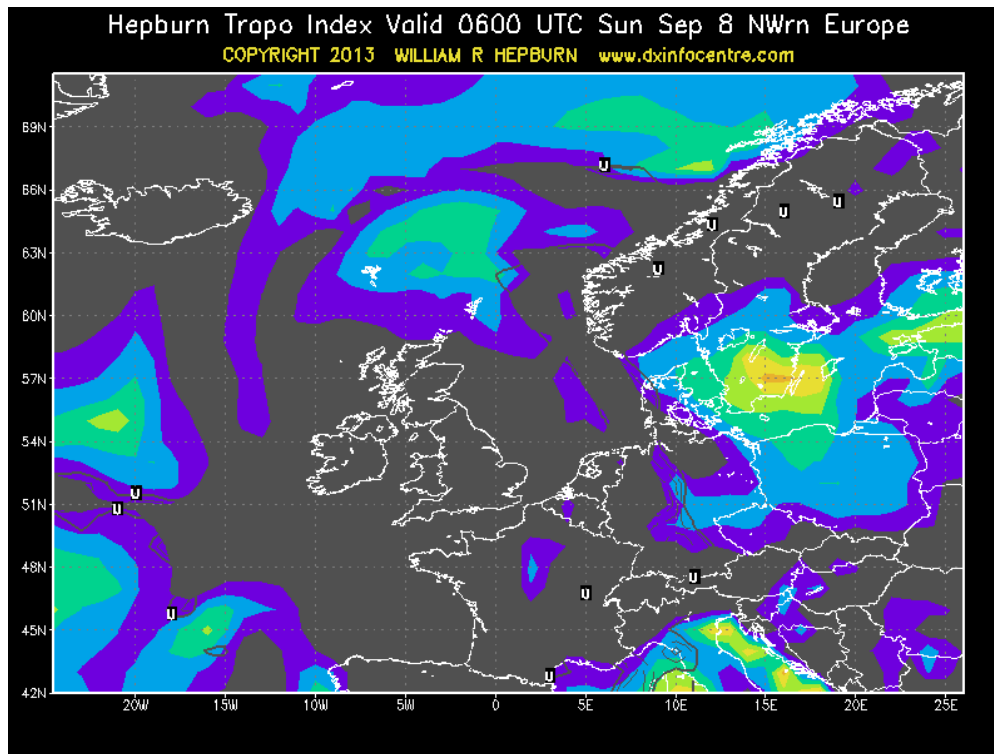

- Horsetrailer (without horse)
- Overview and simplicity
 - Only 1 turnable antenna system
 - Limit the number of buttons, cables and mess
- Rackmounted equipment
- Screens for 1st and 2nd operator

Facts

- PA5DD, OZ1DJJ, OZ1GER & OZ1FDH
- 916 QSO
- 482870 points (527/QSO)
- 123 loc
- 25 DXCC
- ODX YT1VP
1321 km

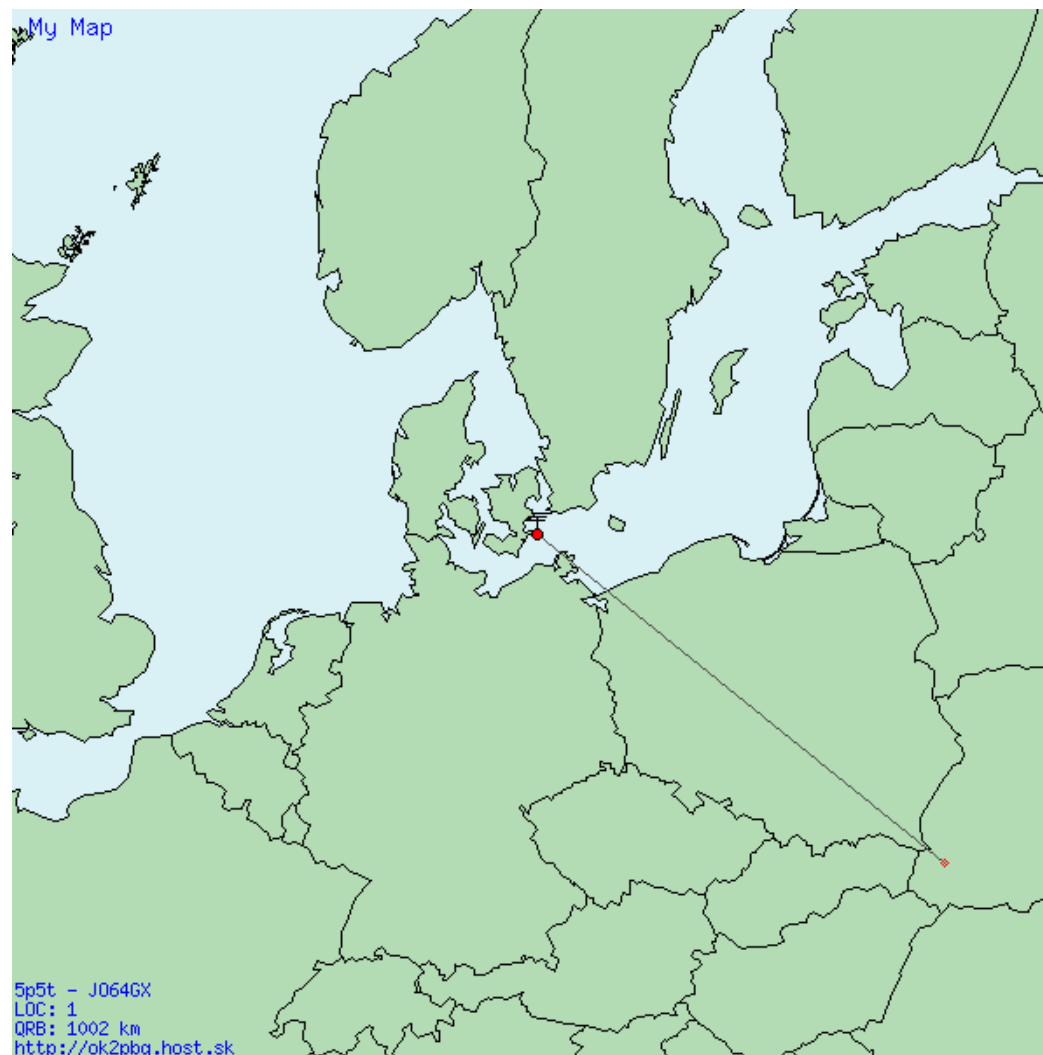

Condx were good, but not fantastic

For once we appeared to be in the sweet spot.
Main competitors were DL0GTH and OE1W

5P5T rx at UY4W KN18OT

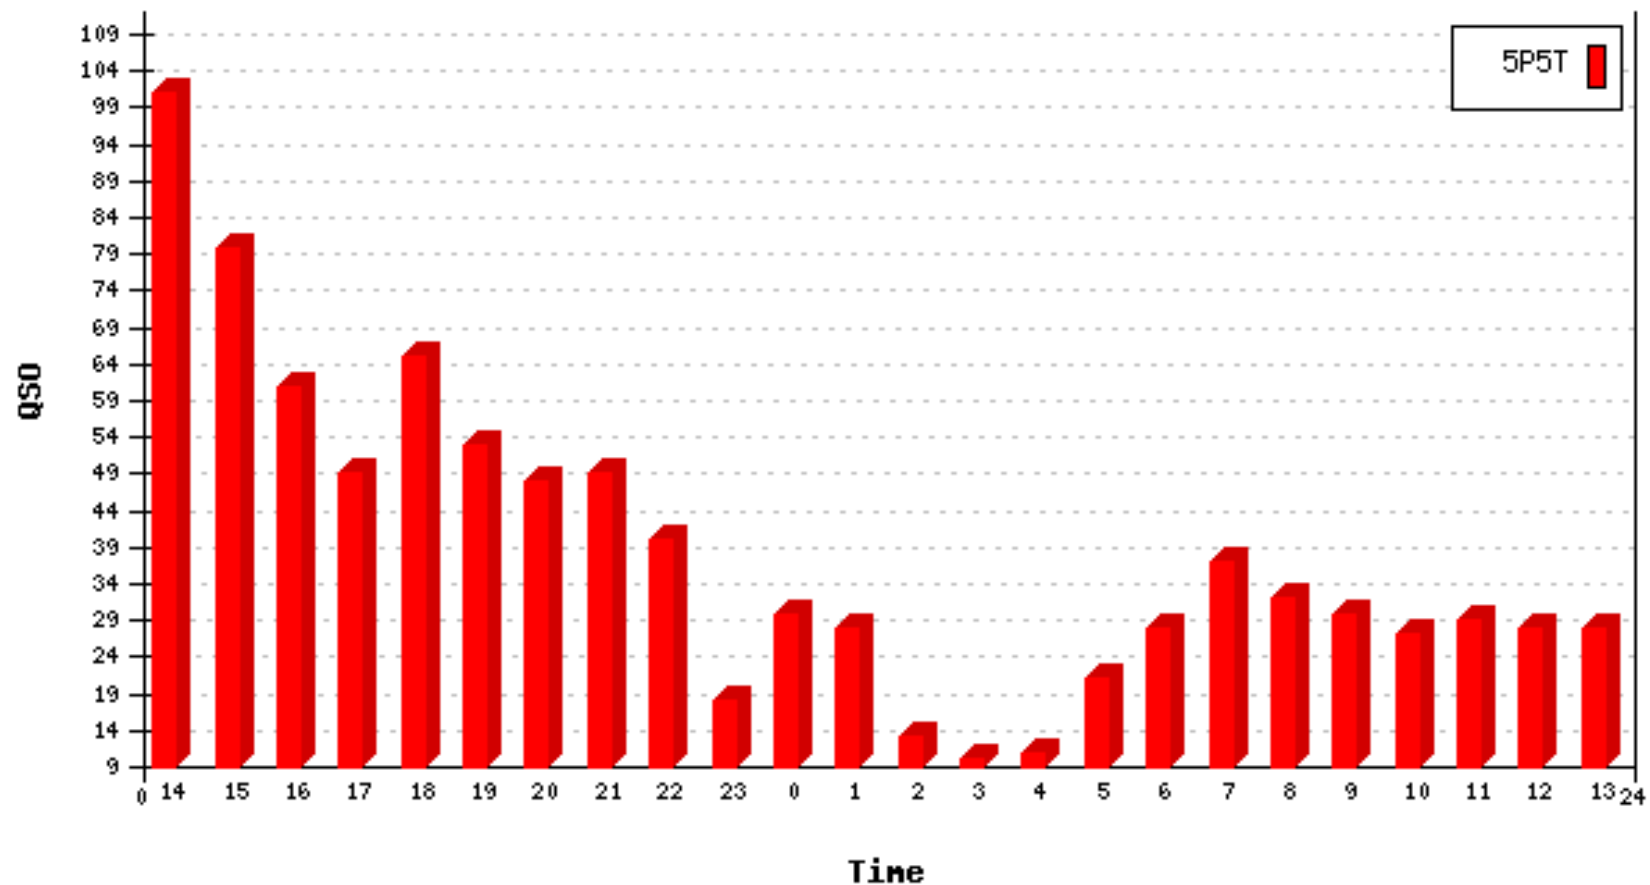

QSO/hour, good activity during night

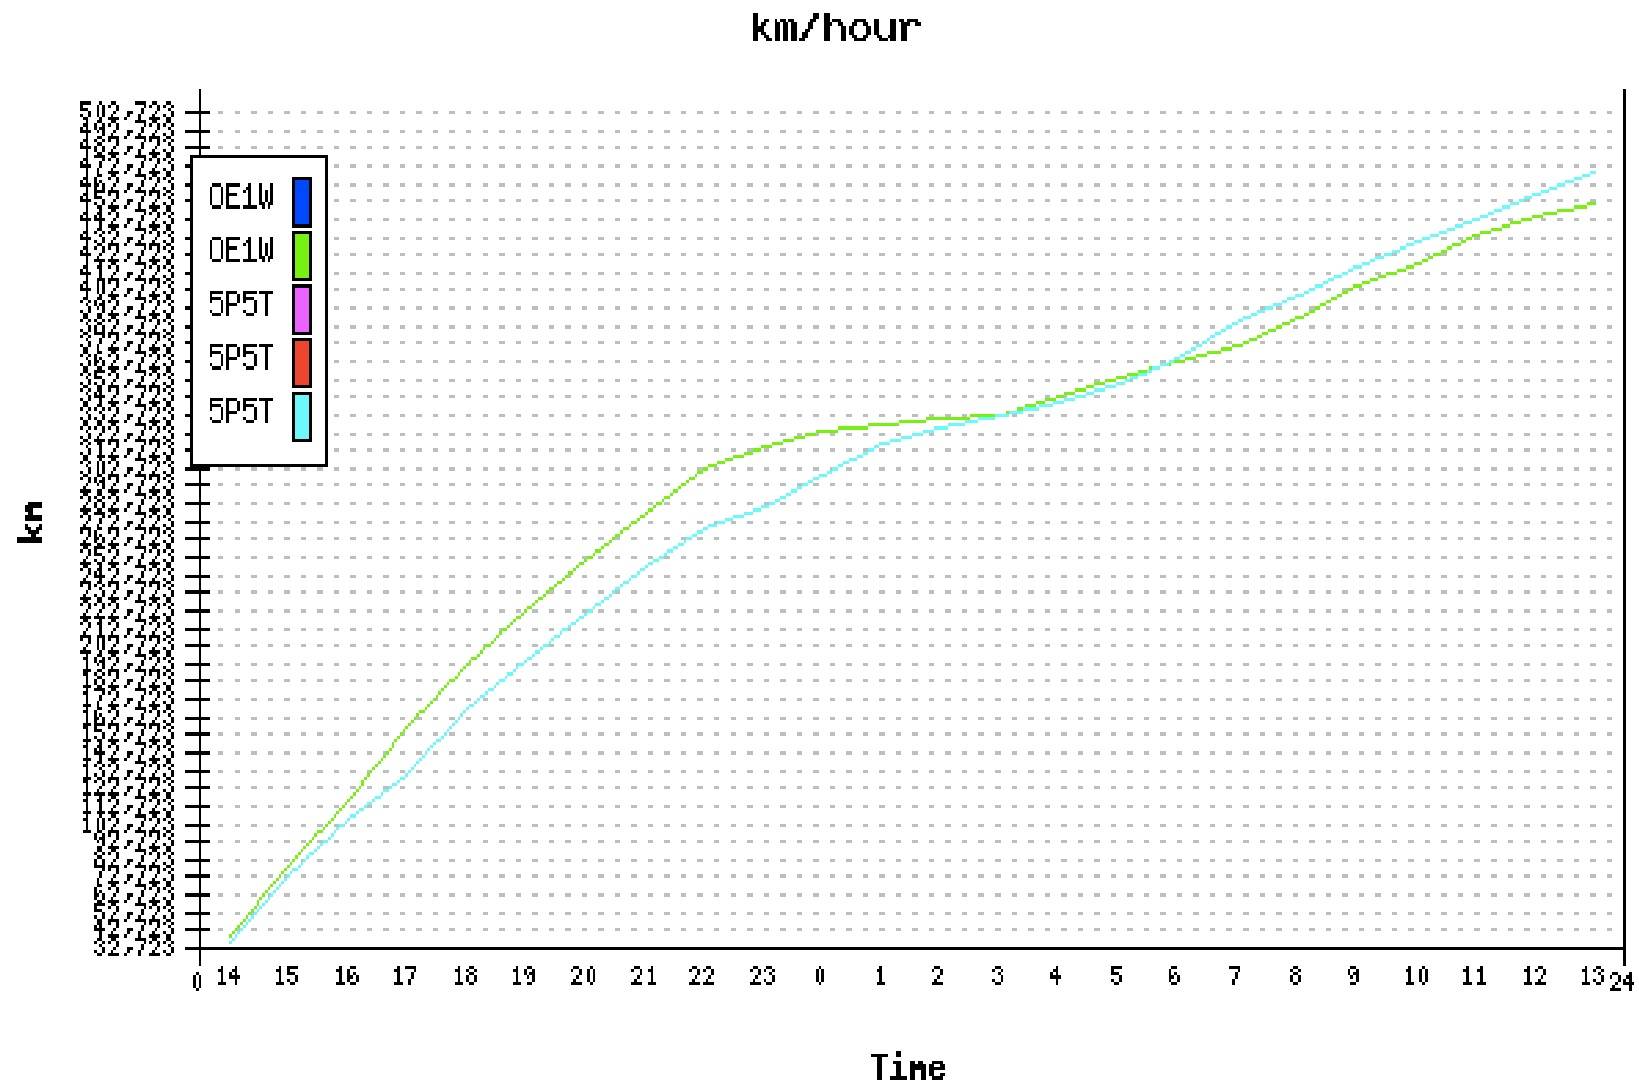

VHF Contest 2013 144 MHz

VHFContest.net

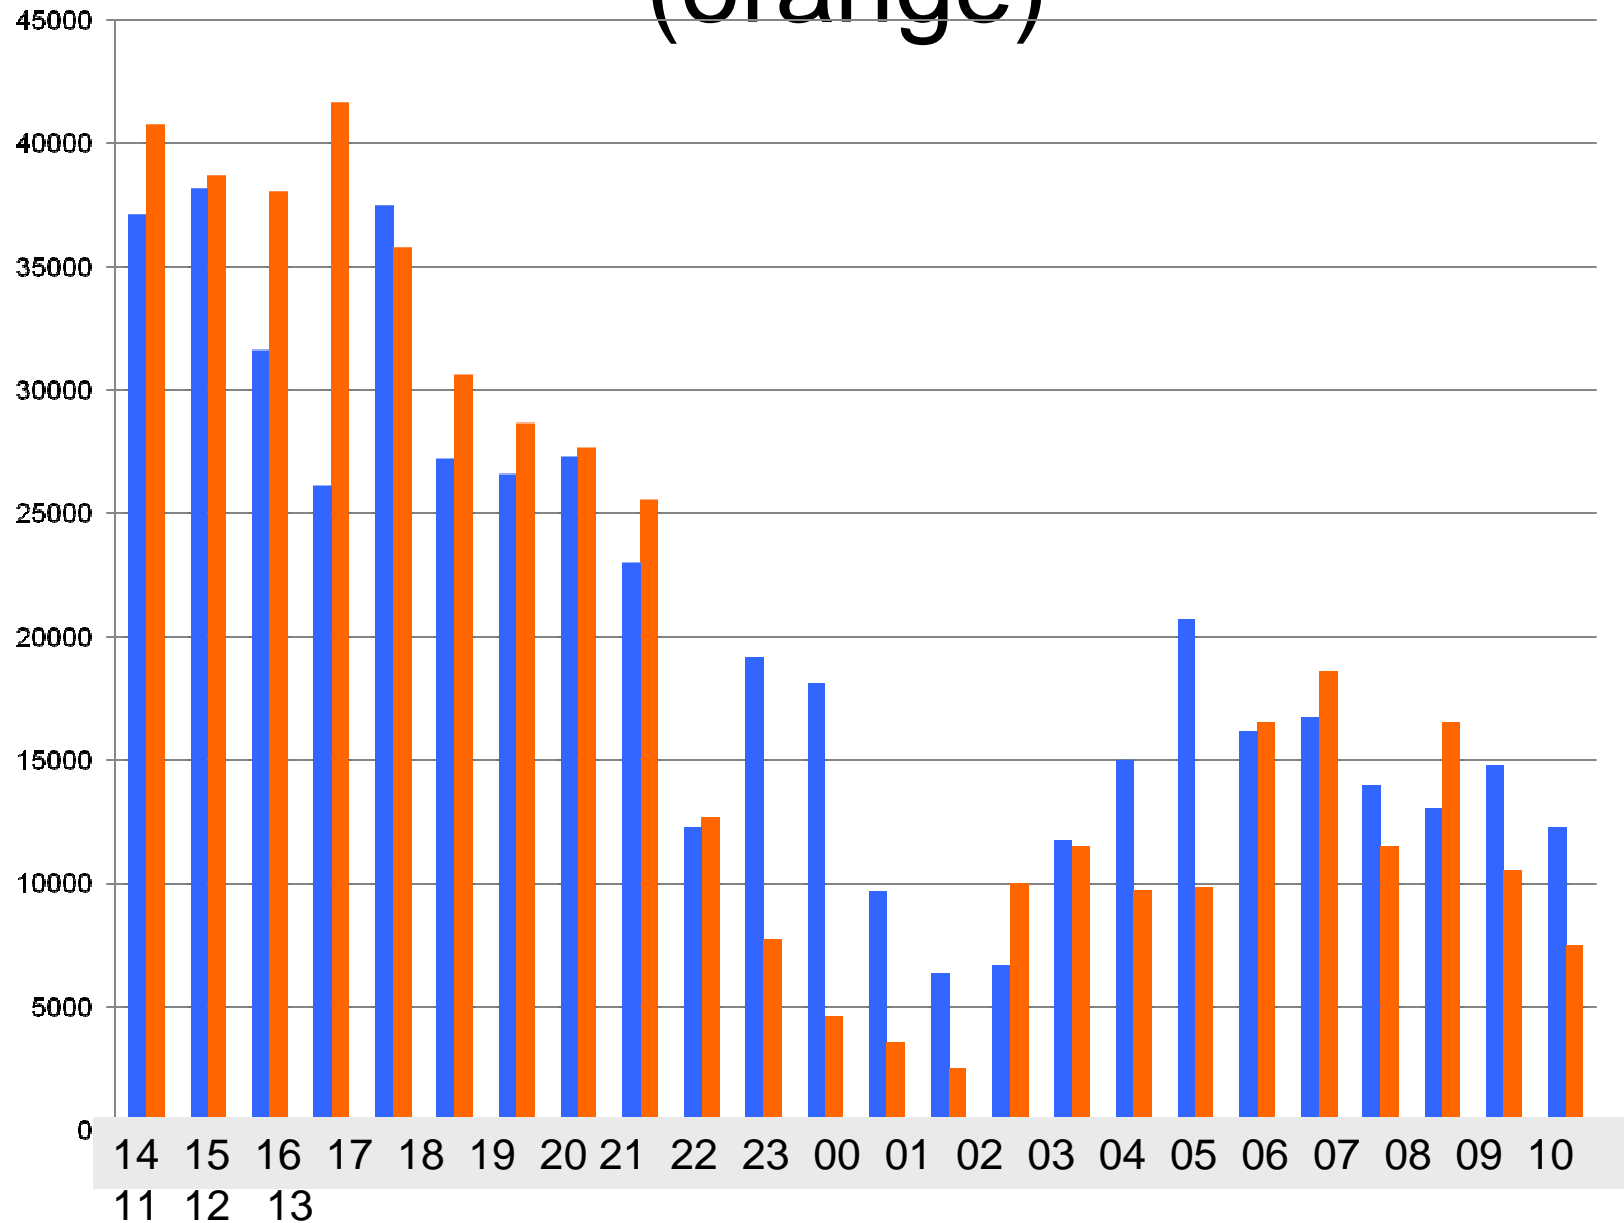

QSO/hod

OE1W had the lead until 0600

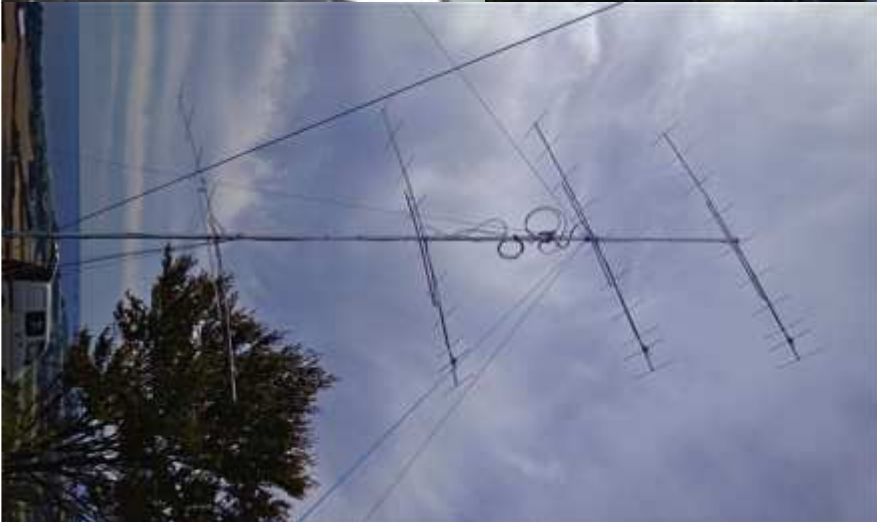

Points/time 5P5T (blue) vs. OE1W (orange)

Equipment

Setup & operating

Food!

- Chili con carne a'la HAM
- PA heating of butter pastry 😊

What does it take to win from up north?

- A good QTH
- Simplicity for the operating position
- A very attentive 2nd operator
- Equipment 99,9% reliable
- At least 16 dB ant gain, wide horizontal angle
- Hard work
- Endurance (every year!)
- Luck (condx and Murphy)
- Fried fish with parsly sauce

Short video saturday 15:18

The end

- There is no other VHF contest like the region 1 september contest!
- You may win or you may loose, but the fun of the effort and teamwork is worth it all.
- Guest operators, new members and visitors are VERY welcome
- CU! in the next contest
