Tuesday	17-5		yellow	yellow	yellow	orange	orange	orange	orange	orange	orange	orange	orange	orange	orange	orange	orange	orange			

Legend:

- 144 MeteorScatter — orange
- 144 EME — green
- 70 MeteorScatter — yellow
- 432 EME — red
- 144 Tropo/contest — blue

* >> Indicates possible longer when activity
* Time's can change, depending on activity. 144 EME or MS is easy to switch !
* If there is a pile-up, please no dupe's:
  - When you worked me in MeteorScatter don't call for an EME QSO also.
  - When you worked me in EME don't call for a MS QSO also.
* Usually a MS QSO takes more time than EME: Pse call EME if you are capable.
* Tropo QSO's will be done inbeween the other modes.

I hope to work a lot of you. Have a look at: www.pa2chr.nl and/or MMMonVHF site's for update's and log
