

## *The new 144MHz antenna*

I think it was Sam Harris, W1FZJ, the unforgotten VHF- pioneer who explained that if the antenna survived the last winter, than it was not big enough.....

After a long time of preparation, today the 15<sup>th</sup> of October, at 09:00 in the morning we lifted our new 4 x 10 ele Yagi antenna to the top of our tower.

Here you can see some impressions from our job. Have fun!
