

Saxonian Mountain- and Fieldday 2008 (SFBT)

=====

The Saxonian-Fieldday is an excellent opportunity for VHF-, UHF- and SHF-activities and GHz-tests from good QTHs and hills with QRP-equipment. Some other QRP-contests take place in the same time (DARC-Fieldday, BBT...)

Contest time and QRGs

=====

02.08.2008 07:00-09:30 UTC 23cm
 09:30-12:00 UTC 13cm, 9cm, 6cm, 3cm, 24GHz and up...
03.08.2008 07:00-09:30 UTC 70cm
 09:30-12:00 UTC 2m (overlap with the Alpen-Adria-Contest)

Working conditions

=====

-The equipment of the Field Day stations must consist of portable equipment, portable antennas and independent from the power line. (You can use Batteries and solar cells...)

-Each station may be contacted, only once per band.

-Fieldday station sign "/p", "/m", "/mm", or "/am".

-Pse try to work minimum 30% of stations in the squares: JO50, JO60, JO61, JO70, JO71 -or- your own QTHs is in one of this squares.

-All modes, only direct QSOs

-Maximum 15 Watt Output Power

Classes of Operation

=====

-Multi operator one log per band
-Single Operator one log per band
